Peter Job Search One Pager 2024 - v2

Role Preferences [order by priority desc]

Overall theme: for my next role is to maximize my productivity at work while growing my skills.
Timeline: Ideally, I would like to wrap up interviewing by Election day.

1. **Role / Career Growth** 💡 📈:
   - I intend to learn through **broader ownership** and to have more of my work-time be spent **with people** (e.g. customer calls, or recruiting or x-functional work).
     i. For context, it previously felt right working on consolidating emails at Parafin (a **x-functional project**) and indulging into side-projects (**e2e build**).
   - That said, I will likely start by deploying my core skills of debugging 🐞, setting up systems, working with SWE GPTs , procuring SaaS, APIs, recruiting, but midterm want to broaden up.
2. **Culture and Founders** 🌀:
   - Looking to **"vibe" with the Founders** as they imply the culture. Friends in common is a good signal, also "high information throughput" ⚡, calmness, maturity and a good emoji game 🫠
3. **Practical Considerations** 📝:
   - **Work Time**: No weekend work except on-call rotations, maybe Sunday nights to prep.
   - and location: **HQ in San Francisco, Hybrid/In-office**.
   - **Company Stage 5-50 people;**
4. **Line of Business:**
   - **B2B** .
   - Ideally a **Pioneer** in their field; Even if a new spin on an old use-case
   - **Industry**: I tend to like "boring" things which can me much improved.

My Experience in a Tweet

tldr; career journey is from the abstract to reality.
Longer form: A Slovak-Hungarian Technical Math Whiz; Graduated w/ no student debt; Got Green Card from Google; Did a bunch of high-stakes Fintech infra - most impact the 5 years at Robinhood; Tried a few "founder" hustles learning the product-first-fallacy the hard-way; so pivoted and did some self GC construction;

Past Perf Reviews TLDR;

- **Pros**: great to work with, cares to do the right thing, beautiful code, no BS, top-notch emoji game
- **Cons**: can be a bit chaotic, distracted (working on it)
- For referrals ask our common connections on LI.

Public Profiles:

- See all the good things at LinkedIn https://www.linkedin.com/in/peter-csiba/
- Sometimes I post random stuff https://x.com/peter_csiba
- Judge my coding based on these cca 1,000 commits: https://github.com/petercsiba/

Random Achievements

- Most conducted Eng interviews of year at Robinhood
- Top 3 meme of day on Google Memegen
