Peter Job Search One Pager 2024

Looking to close this search by Halloween 🎃

Role Preferences [order by priority desc]

1. **Role / Career Growth** 💡 :
   - I desire transitioning into a x-functional or management role, or generally a role involving more humans than computers. Got started on this as my last project at Parafin, my "founder" tryout and during self-GCing construction.
   - That said I will likely start by deploying my core skills of debugging, setting up systems, working with junior SWE GPTs, procuring SaaS, APIs, … but eventually I want to do the above.
2. **Culture and Founders** 🌀**:**
   - I need to **"vibe" with the CEO** and the implied culture. My culture preference is best quantifiable as a mix of **curiosity, calm intensity and fun**.
3. **Practical Considerations** 📝**:**
   - **Work Time**: No weekend work except on-call rotations
   - and Space: **HQ in San Francisco, Hybrid**
4. **Company Stage**
   - **5-50 people;**
   - **Found PMF,** i.e. can focus as validated and retaining paying customers.
5. **Line of Business:**
   - **B2B**
   - **Revenue**: Has reasonable ARR.
   - Ideally a **Pioneer** in their field; Even if a new spin on an old use-case
   - **Industry**: Not into gaming, entertainment, e-commerce, productivity, and esp. no crypto

My Experience in a Tweet

Slovak-Hungarian Technical Math Whiz; Graduated w/ no student debt; Got Green Card from Google; Did a bunch of high-stakes Fintech infra - most impact the 5 years at Robinhood; Tried a few "founder" hustles learning the product-first-fallacy the hard-way; so pivoted and did some self GC construction;

Past Perf Reviews TLDR;

- **Pros**: great to work with, cares, beautiful code, no BS, top-notch emoji game
- **Cons**: communication, focus (worked on those)
- For referrals [ask our common connections on LI](#).
